## WARNING

Use of a TV that is too heavy or large is hazardous. A TV that is too heavy will create a risk of a tip-over that can cause severe injury or death. A TV that is too large for the available space might be accidentally pushed or bumped off the furniture, or subject to tip-over.

- Check the size and weight of your TV. Compare it to the diagram below – **before you begin assembly!**
- This Sauder unit is designed for use with televisions weighing less than 70 pounds. **Never** use with a TV that weighs more.
- The size of the television, front-to-back and side-to-side, must fit within the space defined in the diagram.
  - **Never** place the front edge of the TV past the front edge of the TV support shelf (or stop molding – if equipped)
  - **Never** allow the sides of the TV to extend past the side edges of the TV support surface.
  - If the TV has a CRT picture tube, the picture tube cone may extend past the rear of the support shelf.
- Be sure to apply the warning label as instructed in the last assembly step. The label provides important safety related information.
